Comments to First Public Draft Economic Sustainability Plan for the Sacramento-San Joaquin Delta due 9.2.2011

Missing in these comments is the integration and monitoring of mitigation measures under CEQA in each and every General Plan.

General Plan and its Elements work when Mitigation Measures are adhered to.

We have no indication in this report.

The Elements are not distinguished nor integrated with all the General Plans. How does one know if there is continuity across municipalities.

Are there any General Plan Amendments to be considered. Some municipalities may not circulate documentation under CEQA.

How are federal plans, under US Army Corps of Engineers and other agencies, incorporated, monitored and enforced.

How are scenarios accountable. What data is/will be collected and who will review that data.
